Subject Index

A

Abdominal wall peristomal abscess following percutaneous endoscopic gastrostomy, 289
Abscess, abdominal wall peristomal, following percutaneous endoscopic gastrostomy, 289
Aged, *see* Elderly
Alanyl-glutamine
  diseases affecting metabolism of, 52
  infusions in acute pancreatitis, 43
Aluminium loading in children on long-term parenteral nutrition, 79
American Anthropometric Norms unsuitable for assessing nutritional status of a French population, 168
Amino-acids(s)
  branch chain, *see* Branched chain amino-acids
  gut patterns, hysterectomy and semi-starvation and their effects on, 253
  liver patterns, hysterectomy and semi-starvation and their effects on, 253
  in muscle, *see* Muscle
  plasma patterns
    in sepsis and trauma patients, 241
    in severely depleted surgical patients, 206
  supplementation, following severe burn injury, 226
Anergy and malnutrition in elderly hospital populations, clinical outcome correlated with, 185
Anthropometric indices in elderly females with fractured neck of femur, low, 190
Anthropometric Norms, American, nutritional status of a French population and the unsuitability of, 168
Antibiotic-lock technique as treatment for catheter-related sepsis during parenteral nutrition, 220
Anticatabolic properties of branched chain amino-acids in post-operative patients, 246
Appetite, weight control and, 291
Arvid Wretlind 1989 Lecture on hormonal control of protein turnover, 115

B

Babies, *see* Infants
Bioelectrical resistance measurements in patients with chronic obstructive pulmonary disease, 266
Bone marrow transplantation, patients undergoing parenteral nutrition in, 97
  serum carnitine levels in, 337
Branched chain amino-acid(s)
  anticatabolic properties in post-operative patients, 246
  in sepsis and trauma patients, infusion of TPN solutions containing, 241
  in severe burn injury, supplementation with, 226
Branched chain keto acids in severe burn injury, supplementation with, 226
Broviac catheters, disinfectant evaluation in catheter-related sepsis in long-term parenteral nutrition with, 131
Burn injury, branched chain amino/keto acid supplementation following severe, 226

C

Cachexia, cancer, energy balance and, 319
Calcium and phosphorus balance in very low birthweight babies on TPN, 89
Cancer patients
  cachexia in, energy balance and, 319
  gastric, post-operative enterocutaneous fistulas in, treatment of, 237
  glucose vs. glucose/fat solutions in, 325
  weight-losing, palmitate turnover and its response to glucose infusion in, 150
Carbohydrate, glutamine-stimulated anabolism, 33
Carnitine levels/balance
  in bone marrow transplant patients, 337
  and supplementation in patients with persistent post-operative infection, 195
Catabolic properties, anti-, of branched chain amino-acids in post-operative patients, 246
Catheter(s)
  Broviac, disinfectant evaluation in sepsis in long-term parenteral nutrition with, 131
  sepsis associated with, *see* Sepsis
Catheterisation, long saphenous vein, for chronic venous access, 127
Children, *see also* Infants
  aluminium loading in, on long-term parenteral nutrition, 79
  in gastroenterology departments, catheter-related sepsis during long-term parenteral nutrition in, 73
  at home, parenteral nutrition in, 65

Chinese population, elderly, intake and blood levels of minerals in an, 9
Cholestatic jaundice, hepatic function in septic patients with, effects of glucose vs. fat-based TPN on, 234
Chronic obstructive pulmonary disease, bioelectrical resistance measurements in patients with, 266
Contamination of enteral feeds, decanting as source of, 157
Crohn's disease
  potassium/fat/water during TPN in, total body, 272
  zinc and vitamin C supplementation and their effects on immune status in, 137
Cystine-containing short-chain peptides, in vitro hydrolysis, 37

D

Decanting as source of contamination of enteral feeds, 157
Diseases, alanyl-glutamine and glycyl-glutamine metabolism affected by, 52, 52
Disinfectant evaluation in catheter-related sepsis in long-term parenteral nutrition with Broviac catheters, 131

E

Elderly Chinese population, intake and blood levels of minerals in an, 9
Elderly females with fractured neck of femur, low anthropometric indices in, 190
Elderly (geriatric) patients
  anergy and malnutrution related to clinical outcome in, 185
  dietary supplements in, effects on nutritional status and clinical outcome, 179
Electrical resistance measurements, bio-, in patients with chronic obstructive pulmonary disease, 266
Emulsions, fat, *see* Fat emulsions
Endoscopic gastrostomy, percutaneous, abdominal wall peristomal abscess following, 289
Endotoxaemia, muscle glutamine and regulation of muscle protein balance in, 34
Energy
  balance, cancer cachexia and, 319
  expenditure, resting
    in a clinical setting, 299
    in injured/septic/malnourished patients on intranveous diets, 305
Enteral feeds, decanting as source of contamination of, 157
Enteral nutrition
  home, magnesium deficiency with, 147
  intestinal microflora function in healthy adults and, 163
Enterally delivered glutamine and glutamate, utilisation, 50
Enterocutaneous fistulas in post-operative gastric cancer patients, treatment, 237

F

Fat
  intolerance, during TPN, accuracy of plasma turbidity measurement for determining, 172
  metabolites, plasma, effects of surgery and nutritional regimen on, 1
  total body, during TPN in Crohn's disease, 272
Fat-based vs. glucose-based TPN, effects on hepatic function in septic patients with cholestatic jaundice, 234
Fat emulsions/lipid emulsions
  in parenteral nutrition
    effect on platelets, 214
    after liver transplantation, 331
  reticuloendothelial function and the effects of infused, 260
  in TPN, flocculation by heparin, 29
Fat/glucose vs. glucose solutions in cancer patients, 325
Femur, fractured neck of, low anthropometric indices in elderly females with, 190
Fistulas, enterocutaneous, in post-operative gastric cancer patients, treatment, 237
French population, American Anthropometric Norms unsuitable for assessing nutritional status of a, 168

G

Gastric cancer, post-operative enterocutaneous fistulas in patients with, treatment of, 237
Gastroenterology patients
  paediatric, catheter-related sepsis during long-term parenteral nutrition in, 73
  selenium status and supplementation during TPN in, 281
Gastrointestinal tract, amino-acid gradients across, hysterectomy and semi-starvation and their effects on, 253
Gastro-oesophageal reflux, nasogastric tubes as a cause of, 347
Gastrostomy, percutaneous endoscopic, abdominal wall peristomal abscess following, 289
Geriatric patients, *see* Elderly

Glucose
vs. fat-based TPN, effects on hepatic function in septic patients with cholestatic jaundice, 234
vs. glucose/fat solutions in cancer patients, 325
palmitate turnover and its response to infusion of, in weight-losing cancer patients, 150
Glutamate
enterally delivered, utilisation, 50
α-ketoglutarate infusion affecting metabolism of, 46
Glutamine, 31–52, 113, 294, *see also* Alanyl-glutamine; Glycyl-glutamine
analogues, 41
enterally delivered, utilisation, 50
intestinal metabolism
effects of sepsis on, 49
in HIV-infected patients, 48
α-ketoglutarate infusion affecting metabolism of, 46
lymphocytic metabolism, 36
muscle, *see* Muscle
Proceedings of the Second International Workshop on metabolism of, 31–152, 113, 294
protein and carbohydrate anabolism stimulated by, 33
pulmonary metabolism, effects of sepsis on, 49
safety and efficacy of, 35
short-chain peptides containing, in vitro hydrolysis, 37
Glycyl-L-glutamine, diseases affecting metabolism of, 52
Gut, *see entries under* Gastr-

H

Heparin, flocculation by, of fat emulsions in TPN, 29
Hepatic function etc., *see* Liver
HIV-infected patients, intestinal metabolism of glutamine in, 48
Home
enteral nutrition at, magnesium deficiency with, 147
parenteral nutrition at, with children, 65
Hormonal control of protein turnover (Arvid Wretlind Lecture 1989), 115
Hysterectomy in rats
indomethacin effects on urea synthesis capacity and weight loss after, 103
and semi-starvation, amino-acid gradients across liver/muscle/gut and the effects of, 253

I

Immune system
In Crohn's disease, effect of zinc and vitamin C supplementation on status of, 137
glutamine flux between muscle and, metabolic control logic applied to, 113
Indomethacin effects on urea synthesis capacity and weight loss after hysterectomy in rats, 103
Infants/babies/neonates, *see also* Children
preterm, parenteral nutrition in, 57
very low birthweight on TPN, calcium and phosphorus balance in, 89
Infection, persistent post-operative, carnitine supplementation and carnitine balance in patients with, 195, *see also* Sepsis
Injury, *see* Trauma patients
Intestine
glutamine metabolism in *see* Glutamine
microflora in, function in healthy adults of, enteral nutrition and, 163
D-Xylose absorption by, early post-operative, 17
Intravenous diets, resting energy expenditure in injured/septic/malnourished patients on, 305
Intravenous protein hydrolysates, 39

J

Jaundice, cholestatic, hepatic function in septic patients with, effects of glucose vs. fat-based TPN on, 234

K

Keto acid supplementation following severe burn injury, branched chain, 226
α-Ketoglutarate infusion affecting glutamate and glutamine metabolism, 46

L

D-Lactic acid metabolism after oral load of DL-lactate, 23
Lipid emulsions, *see* Fat emulsions
Lipoproteins, plasma, effects of surgery and nutritional regimen on, 1
Liver
amino-acid gradients across, hysterectomy and semi-starvation and their effects on, 253
in septic patients with cholestatic jaundice, effects of glucose-based vs. fat-based TPN on, 234
transplantation, fat emulsions in parenteral nutrition after, 331
Lung, *see entries under* Pulmonary
Lymphocytes, glutamine metabolism, 36

M

Magnesium deficiency with home enteral nutrition, 147
Malnutrition/malnourishment, *see also* Starvation
  and anergy in elderly hospital populations, clinical outcome correlated with, 185
  resting energy expenditure in states of, intravenous diets and, 305
Metabolic control logic applied to glutamine flux between muscle and immune system, 113
Metabolic studies, stabilisation of plasma substrate concentrations as a model for conducting, 313
Microflora, intestinal, function in healthy adults of, enteral nutrition and, 163
Minerals, intake and blood levels of, in an elderly Chinese population, 9, *see also specific minerals*
Muscle
  amino-acid patterns
    hysterectomy and semi-starvation and their effects on, 253
    in severely depleted surgical patients, 206
  glutamine in
    in endotoxaemia, 34
    and in immune system, metabolic control logic applied to flux between, 113
  protein balance, in endotoxaemia, 34
  voluntary skeletal, starvation effects on function of, 231

N

Nasogastric/nasoenteral tubes
  gastro-oesophageal reflux caused by, 347
  polyurethane, 7g-weighted vs. unweighted, spontaneous transpyloric passage and clinical passage of, 109
Neonates, see Infants

O

Obstructive pulmonary disease, chronic, bioelectrical resistance measurements in patients with, 266

P

Palmitate turnover and its response to glucose infusion in weight-losing cancer patients, 150
Pancreatitis, acute, alanyl-glutamine infusions in, 43
Parenteral nutrition
  in bone marrow transplantation, 97
  in children/infants/babies, *see* Children; Infants
  fat/lipid emulsions, *see* Fat emulsions/lipid emulsions
  long-term, sepsis in, *see* Sepsis
  short-chain peptides in, 45
  total
    branched chain amino-acids in, sepsis and trauma patients, 241
    fat emulsions in, flocculation by heparin, 29
    fat-based vs. glucose-based, effects on hepatic function in septic patients with cholestatic jaundice, 234
    plasma turbidity measurement for determining fat intolerance during, accuracy of, 172
    potassium/fat/water during, total body, in Crohn's disease, 272
    selenium status and supplementation during, in gastroenterology patients, 281
    vitamin K1 source in patients on, unknown, 85
Peptides, short-chain
  glutamine-/cystine-/tyrosine containing, in vitro hydrolysis, 37
  in parenteral nutrition, 45
Peristomal abscess, abdominal wall, following percutaneous endoscopic gastrostomy, 289
Phosphorus and calcium balance in very low birthweight babies on TPN, 89
Plasma
  amino-acid patterns, *see* Amino-acids
  lipoproteins and fat metabolites, effects of surgery and nutritional regimen on, 1
  stabilisation of substrate concentrations, as a model for conducting metabolic studies, 313
  turbidity measurement, for determining fat intolerance during TPN, 172
Platelets, parenteral nutrition with different lipid emulsions affecting, 214
Polyurethane nasoenteral tubes, 7g-weighted vs. unweighted, spontaneous transpyloric passage and clinical passage of, 109
Post-operative patients
  anticatabolic properties of branched chain amino-acids in, 246
  D-xylose intestinal absorption in early, 17
  with gastric cancer, enterocutaneous fistulas in, treatment of, 237
  infection in, persistent, carnitine supplementation and carnitine balance in, 195
  severely depleted, muscle and plasma amino-acid patterns in, 206
  zinc depletion as a complication in, 341
Potassium during TPN in Crohn's disease, total body, 272
Preterm infants, parenteral nutrition in, 57

Protein(s), *see also* Lipoproteins
glutamine-stimulated anabolism, 33
hydrolysates, intravenous, 39
muscle, regulation of balance in endotoxaemia, 34
turnover
hormonal control of, (Arvid Wretlind Lecture 1989), 115
nutrient supply and its effects on, 294
Pulmonary disease, chronic obstructive, bioelectrical resistance measurements in patients with, 266
Pulmonary glutamine metabolism, effects of sepsis on, 48

R

Reflux, gastro-oesophageal, nasogastric tubes as a cause of, 347
Resistance measurements, bioelectrical, in patients with chronic obstructive pulmonary disease, 266
Reticuloendothelial system, fat emulsions and their effects on, 260
after liver transplantation, 331

S

Saphenous vein, long, catheterisation, for chronic venous access, 127
Selenium status and supplementation during TPN in gastroenterological patients, 281
Semi-starvation, hysterectomy and, amino-acid gradients across liver/muscle/gut and the effects of, 253
Sepsis, *see also* Infection
branched chain amino-acid enriched TPN solutions in, infusion, 241
catheter-related, in long-term parenteral nutrition with Broviac catheters, disinfectant evaluation in, 131
in paediatric gastroenterology patients, 73
catheter-related, in parenteral nutrition, antibiotic-lock technique as treatment for, 220
cholestatic jaundice complicating, hepatic function in, fat-based vs. glucose-based TPN in and its effects on, 234
intestinal and pulmonary glutamine metabolism affected by, 49
resting energy expenditure in, intravenous diets and, 305
Serum carnitine levels in bone marrow transplant patients, 337
Starvation, *see also* Malnutrition
semi-, hysterectomy and, amino-acid gradients across liver/muscle/gut and the effects of, 253
work capacity and voluntary skeletal muscle function and the effects of, 231
Surgery, effects on plasma lipoprotein and fat metabolites on, 1, *see also* Post-operative patients

T

Transplantation
bone marrow, *see* Bone marrow transplantation
liver, fat emulsions in parenteral nutrition after, 331
Trauma/injury patients
branched chain amino-acid enriched TPN solutions in, infusion, 241
resting energy expenditure in, on intravenous diets, 305
Tyrosine-containing short-chain peptides, in vitro hydrolysis, 37

U

Urea synthesis capacity after hysterectomy in rats, indomethacin effects on, 103

V

Venous access, chronic, long saphenous vein catheterisation for, 127
Vitamin C supplementation, effect on immune status in Crohn's disease, 137
Vitamin K1 source in patients on TPN, unknown, 85

W

Water, total body, during TPN in Crohn's disease, 272
Weight,
control, appetite and, 291
loss, after hysterectomy in rats, indomethacin effects on, 103
Work capacity, effects of starvation on, 231

X

D-Xylose, early post-operative intestinal absorption, 17

Z

Zinc
depletion as a complication of surgery, 341
supplementation, effect on immune status in Crohn's disease, 137
